# ABOUT US

As AYDENİZ ET ve HAYVANCILIK SANAYİ TIC. LTD. STİ. we took the first step by signing the contract with Agriculture and Rural Development Support Institution in Jan 6, 2020 for Aydeniz Meat Integrated Plant in Ivrindi/Balıkesir. Therefore, we realized our project by completing the construction of our EU standard certified Plant. Balıkesir where our Plant takes place provides the conditions of natural pastures, fresh air, cool water from Kaz Mountains and the rich vegetation provides favorable conditions for delicious and quality red meat. We cut our Balıkesir lambs & calves along our veterinarians with hygiene and precision. We deliver our deluxe and healthy meat under the guarantee of AYDENİZ ET from our Plant in Balıkesir to our customers with our young, dynamic and well-educated staff.

Our carefully prepared meat leaves our plant securely and become indispensable for restaurants and end users. We established AYDENİZ ET Integrated Plant in compliance with European standards with 22.000 m2 outdoor area and 5.000 m2 indoor area which makes AYDENİZ ET Turkey's most modern and leading meat integrated plant. Besides our modern standards, we pay utmost attention to cutting techniques and do 100% Halal slaughtering. As Aydeniz Et Integrated Plant we not only cut animals but we also offer services in butchering after slaughtering, product storage, delivery & shipment and waste processing.

The slaughtered animals wait in coolers while our veterinarians monitor the needed temperature of the coolers for a safe delivery. Our integrated plant has a capacity of more than 300 tons/month and hosts over a variety of 50 products. AYDENİZ ET offers healthy meat with a good price to customers. Our target is to supply healthy, quality, delicious and hygienic meat to the market from our EU standard certified Plant.

Our production system and quality have all been certified. As Aydeniz Et Integrated Plant we are pleased to provide you with quality meat that you can consume with trust.
